Goodwood Fixed Income Strategies

- Goodwood Milford Fund Units** - the Goodwood Milford Fund LP (the "Fund") utilizes a core strategy of investing in primarily Canadian corporate bonds selected to provide higher coupon income and capital gains from credit upgrades and other credit enhancing events. Goodwood uses a bottom-up, fundamental investment approach to provide strong risk-adjusted returns with low monthly volatility. To mitigate risk and enhance return, the Fund invests a small portion of its assets in long/short equity investments.
- Segregated Accounts** - Goodwood offers Segregated Managed Accounts ("SMA's") to investors. The SMA's have a similar corporate bond investment strategy to the Goodwood Milford Fund however each SMA is customized to suit an investor's unique goals, objectives and risk tolerances. SMA's do not typically utilize short selling or leveraged strategies and as such, these accounts are offered at a low cost to investors. (Please call for more details).

Goodwood Milford Fund Portfolio Review

Investment Grade Corporate Bonds - The Fund's February return was +2.62%, bringing the Fund's year to date return up to +6.50%. The Fund outperformed the FTSE TMX Canadian Universe Bond Index ("FTSE"), which earned +0.18% in February. This was a result of the Fund's overweight positions in corporate and high yield bonds which outperformed. The February return for the Corporate BBB segment of the Index was +0.45%. The continued strength of the bond market rally filtered down to corporate bonds in February as investors gained more confidence that rate hikes were not on the immediate horizon in the US and Canada. Economic data in Canada included a very weak Q4 GDP report which has resulted in economists lowering their growth forecasts for 2019 to sub 1.5% levels.

Target Allocation Ranges %

High Yield Bonds – The high-yield bond ETF in the US ("HYG") generated a return of +0.75% in February, and +5.73% year to date. The positive tone of market participants towards riskier assets such as equities and high yield bonds led to higher returns. The Funds high yield holdings had solid gains as well.

Equities – Equities continued their strong rally in February as dialogue relating to the US-China trade dispute turned distinctly positive in February. The TSX total return for February was +3.15% and the Dow Jones Industrial Average (DJIA) February return was +4.03%. The Funds Canadian equity positions posted strong gains in February and were the largest contributors to the positive gains in the month.

Preferred Shares – The S&P/TSX Preferred Share Index continues to lag the broad markets generating a return of +1.66% in February which brings the year to date return to +0.62%. The Fund sold some of its positions in February reducing its weight in this asset class.

Portfolio Statistics	FUND
Leveraged Cash Yield (Net)	9.05%
Effective Duration (Years) (Net)	8.3
Sharpe Ratio (1%) - 5 Year	0.62
Net Market Exposure	231.5%
