Goodwood Fixed Income Strategies

- 1) Goodwood Milford Fund Units** - The Goodwood Milford Fund (the "Fund") has a core strategy of investing in corporate bonds selected to provide higher levels of coupon income and potential capital gains from credit upgrades and credit enhancing events. The Fund's manager uses a bottom-up, fundamental investment style to provide strong returns with low monthly volatility. The Fund has the opportunity to invest a smaller portion of its assets in long-short equity investments.
- 2) Segregated Accounts** - Goodwood offers segregated managed accounts ("SMAs") to individual private investors. The SMAs use a similar corporate bond and equity strategy as the Goodwood Milford Fund; however, each SMA is customized to meet investor's goals, objectives and risk tolerances. The SMAs do not typically use short selling or leveraged strategies and as such, are offered at low cost to investors.

Goodwood Milford Fund Portfolio Review

Investment Grade Corporate Bonds - The Fund's September net total return was +2.52%. The FTSE Canada Universe Bond Index Composite return for September was +0.32%. The investment-grade corporate new issue market has been very active so far in 2020. CIBC World Markets forecasts corporate new issues year-to-date are close to surpassing the volume recorded in all of calendar year 2019.

High Yield Bonds - The US iShares iBoxx \$ High Yield Corporate Bond ETF (the "HYG") followed the equity markets weakness generating a -1.22% return in September.

Equities - A number of concerns weighed on the risk appetite of equity investors in September, resulting in negative monthly returns in both the US and Canadian markets. These concerns included: President Trump and the First Lady contracting COVID-19; evidence of a second wave of the Corona virus; lack of agreement in the US on a further stimulus package; uncertainty as to the duration of ballot counting and declaration of a winner in the US presidential election; and, a significant selloff in several technology stocks which previously had been market leaders. This selloff resulted in September performance of -2.18% for the Dow Jones Industrial Average and -2.06% for the S&P/TSX Composite Total Return Index with year-to-date performance of -0.91% and -3.09% for the same indices.

Preferred Shares - The S&P/TSX Preferred Share Index returned +0.16% in September and is down -1.07% year-to-date. The Fund does not hold any investments in preferred shares.

As a reminder, the Fund provides weekly & monthly liquidity and is open to new investors.
