Current Asset Allocation:

Asset selection driven by bottom-up, company specific approach in seeking under-valued securities for the fund. As such, the composition of the portfolio bears limited correlation to the S&P/TSX Composite Index. The portfolio typically holds its core positions for a long period of time (often over 3 years). As such and on purpose, the month-to-month change in asset composition is limited.

Therefore in periods of positive performance the Class A is subject to lower performance fees. Currently only the Class B and Class F units of the Goodwood Fund are offered.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the offering memorandum before investing. The indicated rates of return of the Fund are the historical annual compounded total return including changes in unit value and assume that all distributions made by the Fund were reinvested in additional units of the Fund. The rates of return do not include deduction of sales, transfer, redemption, income taxes payable, or other charges (which distributors may charge) that would have reduced returns. The rates of return are net of all management fees, performance incentive fees and expenses. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. Investment funds can involve significant risks and the value of an investment may go down as well as up. There is no guarantee of trading performance. An investment in the Fund is not intended as a complete investment program and should only be made after consultation with independent investment and tax advisors. Only investors who do not require immediate liquidity of their investment should consider a potential purchase of shares. The risks involved in this type of investment maybe greater than those normally associated with other types of investments. Please refer to the offering memorandum for a further discussion of the risks of investing in the Fund. Performance data from certain market indices (S&P/TSX Composite TRI, S&P/TSX SmallCap TRI) are provided in this presentation for information purposes only. A comparison of the Fund's performance to such market indices is of limited use because the composition of the Fund's portfolio may contain other securities not found in the market index. As a result, no market indices are directly comparable to the results of the Fund.
