**Goodwood Fixed Income Strategies**

- 1) Goodwood Milford Fund Units** - The Goodwood Milford Fund (the "Fund") has a core strategy of investing in corporate bonds selected to provide higher levels of coupon income and potential capital gains from credit upgrades and credit enhancing events. The Fund's manager uses a bottom-up, fundamental investment style to provide strong returns with low monthly volatility. The Fund has the opportunity to invest a smaller portion of its assets in long-short equity investments.
- 2) Segregated Accounts** - Goodwood offers segregated managed accounts ("SMAs") to individual private investors. The SMAs use a similar corporate bond and equity strategy as the Goodwood Milford Fund; however, each SMA is customized to meet investor's goals, objectives and risk tolerances. The SMAs do not typically use short selling or leveraged strategies and as such, are offered at low cost to investors.

**Goodwood Milford Fund Portfolio Review**

**Investment Grade Corporate Bonds** - The Fund's June and YTD returns were -0.69% and +11.95%, compared to the FTSE TMX Canadian Universe Bond Broad Composite Index ("Broad Index") returns of +0.96% and -3.46%, respectively. The key event in June was the mid month US FOMC meeting. The FOMC announced no changes to short term rates but the FOMC released members estimates of future US short term rates which revealed a greater number of estimates forecasting future higher short term rates in 2022 and 2023. The impact on the fixed income markets was that short term rates rose as investors reflected on the potentially higher future short term forecasts. The long end of the curve (10 yr and 30 yr maturities) rallied as investors were encouraged by the absence of discussion at the FOMC meeting of any tapering of the Feds USD \$120mm per month bond purchase program. In Canada, the short end of the Broad Index was down -0.20% and the long end was up +2.81% in June.

**High Yield Bonds** - The US high yield bond ETF (iShares iBoxx \$ High Yield Corporate Bond ETF "HYG") returned +1.16% in June and +2.95% for 2021. US high yield bonds rallied following the strength in equities described below. In the Canadian market, frequent high yield issuer Videotron (rated Ba1/BB+) issued \$750mm of new 3.625% debentures due June 15, 2028 priced at par. The issue traded well and closed the month at \$100.73.

**Equities** - The S&P/TSX Composite TR Index return for June was +2.48% and +17.28% for 2021. The Dow Jones Industrial Average (DJIA) returns were +0.02% and +13.79% for the same periods, respectively. The TSX, S&P 500 and the NASDAQ indices hit new highs in June as US GDP and employment data showed the US economy gaining strength as a result of vaccinations and re-opening. In Canada, our indices had the benefit of a strong rise in crude oil prices.

**Preferred Shares** - The S&P/TSX Preferred Share Index returned -0.22% in June and +14.30% in 2021. The Fund currently holds no preferred shares.

As a reminder, the Fund provides weekly & monthly liquidity and is open to new investors.
