**Goodwood Fixed Income Strategies**

**Goodwood Milford Fund Units** - The Goodwood Milford Fund has a core strategy of investing in corporate bonds selected to provide higher coupon income and capital gains from credit upgrades and credit-enhancing events. The Fund's manager uses a bottom-up, fundamental investment style to deliver strong returns with low monthly volatility. The Fund can invest a portion of its assets in long-short equity investments.

**Institutional Segregated Accounts** – Goodwood offers sub-advisory portfolio management services to pensions, endowments, foundations and other institutional investors. The [investment-grade bond](#) mandate's objective is to preserve capital and provide a high rate of cash coupon income. The environmental, social, and (corporate) governance ("[ESG](#)") [conscious investment-grade bond](#) mandate's objective is to preserve capital and generate income by investing in bonds with good relative ESG performance and attractive coupons.

**Private Client Accounts** - Goodwood offers segregated managed accounts to individual investors utilizing a corporate bond and equity investment strategy similar to the Goodwood Milford Fund; however, each account is customized to meet investors' goals, objectives and risk tolerances.

**Historical Asset Allocation\***

**Goodwood Milford Fund Portfolio Review**

**Investment Grade Corporate Bonds** - The Fund's January return was +0.55%. January was a volatile month for fixed income. In the first part of January, bonds sold off as investors reassessed the aggressive rate cut scenarios that were prevalent in Q4 2023. Bonds rallied at the end of the month resulting in the market finishing close to unchanged. Strong US Q4 GDP numbers and a strong US Nonfarm Payrolls number took the market down again in the first week of February.

The Bank of Canada (the "BoC") met on January 24 and left rates unchanged. The BoC noted the economy stalled in the middle of 2023 and projects first quarter GDP at close to zero. At the US FOMC meeting on January 31 there was a similar no change in rates decision. FOMC Chairman Powell stated the US has hit a peak in rates, but the timing of cuts is uncertain.

**High Yield Bonds** - The US high yield bond ETF (iShares iBoxx \$ High Yield Corporate Bond ETF) returned -0.20% in January.

**Equities** - The S&P/TSX Composite TR Index January return was +0.55% and the Dow Jones Industrial Average total return was +1.31%. Stocks were positive as a result of prospects for rate cuts and positive Q4 earnings releases.

**Preferred Shares** - The S&P/TSX Preferred Share Index returned +5.81% in January. The Fund currently holds no preferred shares.

As a reminder, the Fund provides weekly & monthly liquidity and is open to new investors.

Portfolio Statistics	FUND
Current Yield (Net Weighted Ave)	5.5%
Effective Duration (Years) (Net)	3.5
Information Ratio (XBB) - 3 Year*	0.52
Information Ratio (XCB) - 3 Year*	0.34
Net Capital Invested	116.7%
Correlation to Broad Mkt (TSX)	0.60

\*The Information Ratio is a measure of risk-adjusted return similar to the Sharpe ratio, but in comparison to the iShares Core Canadian Corporate Bond Index ETF (XCB) and iShares Core Canadian Universe Bond Index ETF (XBB) rather than a risk-free rate. If the information ratio is less than zero, it means the manager underperformed the compared Index ETF. Of all the performance statistics, the information ratio is one of the most difficult hurdles to clear. Generally speaking, an information ratio above 0.40 range is considered good.
