

Goodwood: ESG-Conscious Investment-Grade Bonds

Updated: March 1, 2024

OBJECTIVE

The Goodwood environmental, social and (corporate) governance (“ESG”) conscious investment-grade bond mandate’s objective is to preserve capital and generate income by investing in bonds with good relative ESG performance and attractive coupons. Goodwood uses a disciplined, fundamental approach to constructing investment-grade bond portfolios that they believe may reward investors with capital gains due to credit improvements and credit rating upgrades. The ESG-conscious strategy is diversified in position size, industry sectors and term-to-maturity. The mandate invests in approximately 30-40 fixed-income securities issued by companies that have achieved good scores in a third-party ESG valuation process; for safety, the mandate may also invest in Canadas or Provincials. The return target is 50-200 basis points over 5-year Canadas.

PORTFOLIO CONSTRUCTION

The Goodwood ESG-conscious investment-grade bond mandate is typically invested in a portfolio of very liquid issues generating an average yield-to-maturity greater than 4% with an average term-to-maturity of 3-5 years. Goodwood’s flexible, tactical approach allows the mandate to selectively extend or shorten duration exposure in the portfolio when appropriate to capitalize on inefficiencies in fixed-income markets. Issue selection is made from a universe of issuers who have achieved good scores in a third-party ESG evaluation process and offer products or services that are socially acceptable and support sustainable development and ethical business practices¹. The mandate avoids meaningful investment in companies contributing to an adverse societal impact on health (i.e. manufacture/distribution of tobacco, marijuana, alcohol), tools of war or violence (i.e., weapons, weapon systems, cluster munitions, anti-personnel landmines), adult entertainment or gambling, broadcasting/publishing of deliberate misinformation (i.e., inciting religious or race hatred, creating division between societies, preventing social cohesion), commonly held environmentally unsound practices consistently damaging the environment and issuers failing to satisfy or knowingly in breach of workplace health and safety standards.
